	Title
1	Method and apparatus for audio and video synchronizing in MPEG playback systems
2	Video and audio data presentation interface
3	Method and apparatus for synchronizing audio and video data streams in a multimedia system
4	On-line video editing system
5	Method and apparatus for representing and editing multimedia compositions using a tree structure
6	Synchronizing digital audio to digital video
7	System and method for enabling the creation of personalized movie presentations and personalized movie collections
8	Automatic editing of recorded video elements sychronized with a script text read or displayed
9	Rendering an audio-visual stream synchronized by a software clock in a personal computer
10	Indirect manipulation of data using temporally related data, with particular application to manipulation of audio or audiovisual data
11	Synchronizing multimedia parts with reference to absolute time, relative time, and event time
12	Apparatus for creating a visual edit decision list wherein audio and video displays are synchronized with corresponding textual data
13	Interpolation of a sequence of images using motion analysis
14	System and method for controlling synchronization of a time-based presentation and its associated assets
15	Method and apparatus for synchronizing graphical presentations
16	Time inheritance scene graph for representation of media content
17	Integration of media playback components with an independent timing specification
18	Editing interactive content with time-based media
19	Synchronizing multimedia data
20	Interpolation of a sequence of images using motion analysis
21	Systems and methods for creating, modifying, interacting with and playing musical compositions

	Document ID	Inventor
22	US 20020143547 A1	Fay, Todor J. et al.
23	US 6262777 B1	Brewer; Eric T. et al.

	Title
22	Accessing audio processing components in an audio generation system
23	Method and apparatus for synchronizing edited audiovisual files
